Dear Neighbor, 

Nacogdoches Memorial Health is one of the fastest growing, most innovative health systems in East Texas and is working hard to change the face of healthcare for those we serve. From simple beginnings in 1928 to the progressive and forward-thinking health system of today, Nacogdoches Memorial Health has come a long way since those humble days when we were simply known as City Memorial.

Our dedication to excellence was recognized in 2015 and again in 2016, when the readers of the Nacogdoches Daily Sentinel rewarded Memorial Health with multiple Best of Nac awards, including Best Hospital, Best ER and Best Place to Have a Baby. We are always honored by the support of our community and beyond thrilled with their confidence in us. But we believe our community’s confidence in us is well-deserved. With a Joint Commission Certified Stroke Center, Certified Chest Pain Center, Level III Trauma Center, Level III NICU and a stand-alone Inpatient Rehab Facility (Bomar Rehabilitation Center), Memorial Health is the only system in Deep East Texas with all five designations. That places Nacogdoches Memorial Health in a category all its own.

Memorial Health is proud to be the only remaining independent health system in our region. We think it’s important to maintain our independence, because all of our resources and energy are funneled back into our facilities, technology and professional staff, allowing us to be nimble and adapt easily to the local needs of our community. The only stakeholders we answer to are the neighbors we see at the ballpark and the grocery store, and we prefer it that way. We want you to have a strong sense of ownership in Nacogdoches Memorial as your destination of choice for high-quality healthcare. We are Nacogdoches Memorial Health. Where people come first.

Sincerely, Scott Street CEO

Recently Completed Projects

$40 MILLION EXPANSION PROJECT
A 30,000-square-foot Surgery Center, housing eight best-in-class surgical suites with ceiling-mounted boom systems for image-guided surgery, monitoring and instrumentation, is just one part of the $40 million expansion project that has allowed us to serve our patients in elegant, yet functional surroundings, while building on our success to improve existing facilities and provide new, innovative products that better serve our community.

WOMEN’S AND CHILDREN’S CENTER
The Women’s and Children’s Center was designed to be one of the most family-centered, comfortable and attractive labor and delivery programs available in the East Texas area. Each of the 24 private rooms features the latest in technology, safety and comfort for mom and family. Two state-of-the-art C-Section suites are available for moms needing surgical assistance during the birthing process, and Memorial is the only Deep East Texas facility to accommodate vaginal birth after caesarean (VBAC).

ER EXPANSION
When you have a real emergency, you need a real hospital. Unlike freestanding emergency rooms, the 27-room Level III Trauma Center at Nacogdoches Memorial Hospital is backed by the resources of an entire health system, including a Joint Commission Certified Stroke Center, a Chest Pain Center designated by the Society of Chest Pain Centers, and a specially trained team of ER nurses, doctors and specialists — because every second matters.

THE COFFEE SPOT
A light-filled lobby, convenient access to our new Coffee Spot (We proudly serve Starbucks!) and comfortable waiting areas make our visitor experience more enjoyable at Nacogdoches Memorial Hospital. We’ve used soothing colors, interesting curves and unusual architectural lines to give this cutting-edge facility a warm and welcoming atmosphere that matches the attitude of our team.

CONCIERGE SERVICE
Our new bilingual Concierge Service means less guesswork when you walk in the front door of Memorial Health, because a gracious team member is ready to greet you and help you navigate our systems. Our concierge is always ready with a friendly smile, a convenient umbrella, a kind word and a helping hand for patients and visitors alike.

BRIGHT CAFÉ
The Bright Café was dedicated in memory of long-time board member Charles Bright and offers a new sandwich bar, full grill area, freshly prepared breakfast fare, home-style meats and vegetables, a salad bar, freshly baked desserts and a wide variety of beverages. We know that our visitors sometimes need a retreat from a particularly stressful situation; the Bright Café is invitingly decorated and overlooks a peaceful park area.

AUXILIARY CONFERENCE CENTER
The most recent addition to the Memorial structure is a state-of-the-art Auxiliary Conference Center, which will allow us to provide community educational offerings on a variety of health-related subjects. This project was generously funded by the Nacogdoches Memorial Auxiliary. We also have a Café Conference Room and a Community Conference Room for in-house meetings, such as joint replacement seminars and childbirth classes, as well as public endeavors, like support groups and blood drives.

LEVEL III NEONATAL INTENSIVE CARE UNIT
Nacogdoches Memorial Health offers the highest level of care with the only Level III NICU facility in the Deep East Texas region, keeping fragile infants closer to home until they can go home with Mom and Dad. This next-level upgrade includes advancements in staff training and equipment for our free-rate facility.

The new Sports Medicine program is certified to deliver treatment and injury prevention education for sports-related injuries. Our team specializes in establishing realistic goals, maximizing mobility and maintaining strength during training. We provide on-site injury coverage, industrial site evaluations and education for athletic groups and traveling teams.

SENIOR BEHAVIORAL HEALTH SERVICES
In 2015, Nacogdoches Memorial Health launched a much-needed specialized inpatient behavioral health program for individuals 65 and older. Our Senior Behavioral Health Services program can help patients who are experiencing recent short term memory loss, social isolation, depression, grief or symptoms of mental illness. Our multi-disciplinary team approach involves a medical director, licensed social worker, registered nurse and recreational therapist.

NACOGDOCHES MEMORIAL PROFESSIONAL GROUP
In the past year, we began exploring physician practice management opportunities and started bringing talented, established primary care providers and specialists into the Nacogdoches Memorial Professional Group through creative affiliation partnerships. We now boast more than 35 partner providers ready to serve your whole family, some with same-day appointments and all accepting Medicare, Medicaid and private insurance in convenient locations throughout our community.

HELPAD AND PARKING PLAZA
New Helipad and Parking Plaza areas were built on the east side of the hospital campus. The helipad is dedicated in memory of Mervis Lowery, who served on the Nacogdoches County Hospital District Board of Directors for 18 years. Mervis championed the cause of emergency medical services and the establishment of a helicopter pad on our campus which allows us to transfer patients in and out of Nacogdoches Memorial Hospital more quickly and safely.

Ongoing and Soon-To-Be-Completed Projects

INNOVATIVE PARTNERSHIPS
By constantly engaging in strategic collaborations with other organizations, we deliver the very best healthcare options to our patients and their families. Creative partnering with industry-leading organizations like Community Hospital Corporation, Christus Trinity Mother Frances Hospital and Cook Children’s Hospital allow Memorial Health to enhance the quality of services available in our region. Collaborating with partner agencies, while maintaining our independence, means we can provide access to a broader range of services and a higher level of care at lower costs to our patients.

OFFICIAL PARTNER OF SFA ATHLETICS
Nacogdoches Memorial Health is proud to be an Official Partner of SFA Athletics. Axe ‘em, Jacks!

WOMEN’S WELLNESS CENTER
Nacogdoches Memorial Women’s Wellness Center is now open in a beautiful, comfortable new location at 1018 Mound Street, Suite 103. Designed to fulfill an urgent need for the early detection of breast cancer, the highest level of personal care is delivered daily by our sensitive staff members. The latest in bone density scanning technology has arrived! This summer, Memorial introduced three new technologies to the Nacogdoches healthcare scene that will revolutionize cardiovascular treatment while keeping patients close to home, including electrophysiology — a procedure which uses electromagnetic technology to create a real-time 3-D model of the heart, allowing the cardiac electrophysiologist to pinpoint and repair defects using tiny devices that fit within the arteries.

NEW TREATMENTS AND TECHNOLOGIES

JOINT REPLACEMENT CENTER OF EXCELLENCE
One of the most exciting new programs we are launching in the next few months is the Joint Replacement Center of Excellence. Our team of dedicated, specially trained professionals will assist you in your journey toward an improved level of activity and a higher quality of life, through a personalized treatment plan of education, joint replacement surgery and follow-up therapy.

OUTPATIENT SENIOR BEHAVIORAL HEALTH CENTER
Following closely on the heels of our very successful inpatient behavioral health program and responding to the needs of some of our most fragile community members, an Outpatient Senior Behavioral Health Center is slated to open this winter, across the street from Memorial Hospital in the Diagnostic Center.

NACOGDOCHES MEMORIAL MEDICAL OFFICE BUILDING
On the horizon, we are beginning construction of a state-of-the-art medical professional building (scheduled for ground-breaking in January 2017). A mobile mammography coach, a mobile outreach wellness coach, and a Ronald McDonald-type facility for long-term visitors are all on the drawing board, as well. To promote our mission to provide top-quality lifelong healthcare continuity, Nacogdoches Memorial Health is also in the planning stages to establish a skilled nursing facility and engage in a regional senior living facilities program.
